Good morning,

As you may recall, we have talked in past meetings about the need for scientific peer review of the Standards Study. We wanted to share with you the approach we have developed to help address the fact that the Wild Rice Standards Study will not have been published in peer-review

literature prior to the MPCA relying on the study to inform its recommendations. Please see the attached files for a Request for Proposals that outlines our approach for review of the Study and the MPCA preliminary recommendations and rationale about whether or not a change to the current 10 mg/liter wild rice sulfate standard is warranted.

Bid, Proposal or Grant Opportunity Event Name: MPCA PT RFP for Wild Rice Sulfate Standard Expert

Description:

The Minnesota Pollution Control Agency (MPCA) requests proposals from qualified proposers with the necessary experiences and resources to form and facilitate a Wild Rice Sulfate Standard Expert Review Panel (Panel) of experts in water quality standards development and other scientific disciplines listed below. The charge of the Panel will be to review the results from the Wild Rice Sulfate Standards Study (Study) and the MPCA preliminary recommendations and rationale about whether or not a change to the current 10 mg/liter wild rice sulfate standard is warranted. Refer to attached RFP for additional information.
